

U.S. Census Bureau's Population Estimates and Projections

Eric Jensen
Senior Research Scientist for Population Estimates and Coverage Measurement
Population Division
U.S. Census Bureau

Southern California Demographic Workshop
September 24, 2024

*This presentation is released to inform interested parties of ongoing research and to encourage discussion of work in progress.
Any opinions and conclusions expressed herein are those of the author(s) and do not reflect the views of the U.S. Census Bureau.*

The Population Estimates Program

- The Population Estimates Program (PEP) disseminates official measures of population and housing units between decennial censuses
- Developed as per Title 13, U.S. Code, Section 181
- Use cases include:
 - Population controls and denominators
 - Academic and business research
 - Program planning in the public and private sectors
- Estimates extend back to 1900
- Time series are released annually featuring data for the date of the last census through the vintage year, which represents the latest year of estimates available
- Vintage 2023 is the current series
 - Contains estimates for April 1, 2020 to July 1, 2023

Why We Disseminate Estimates

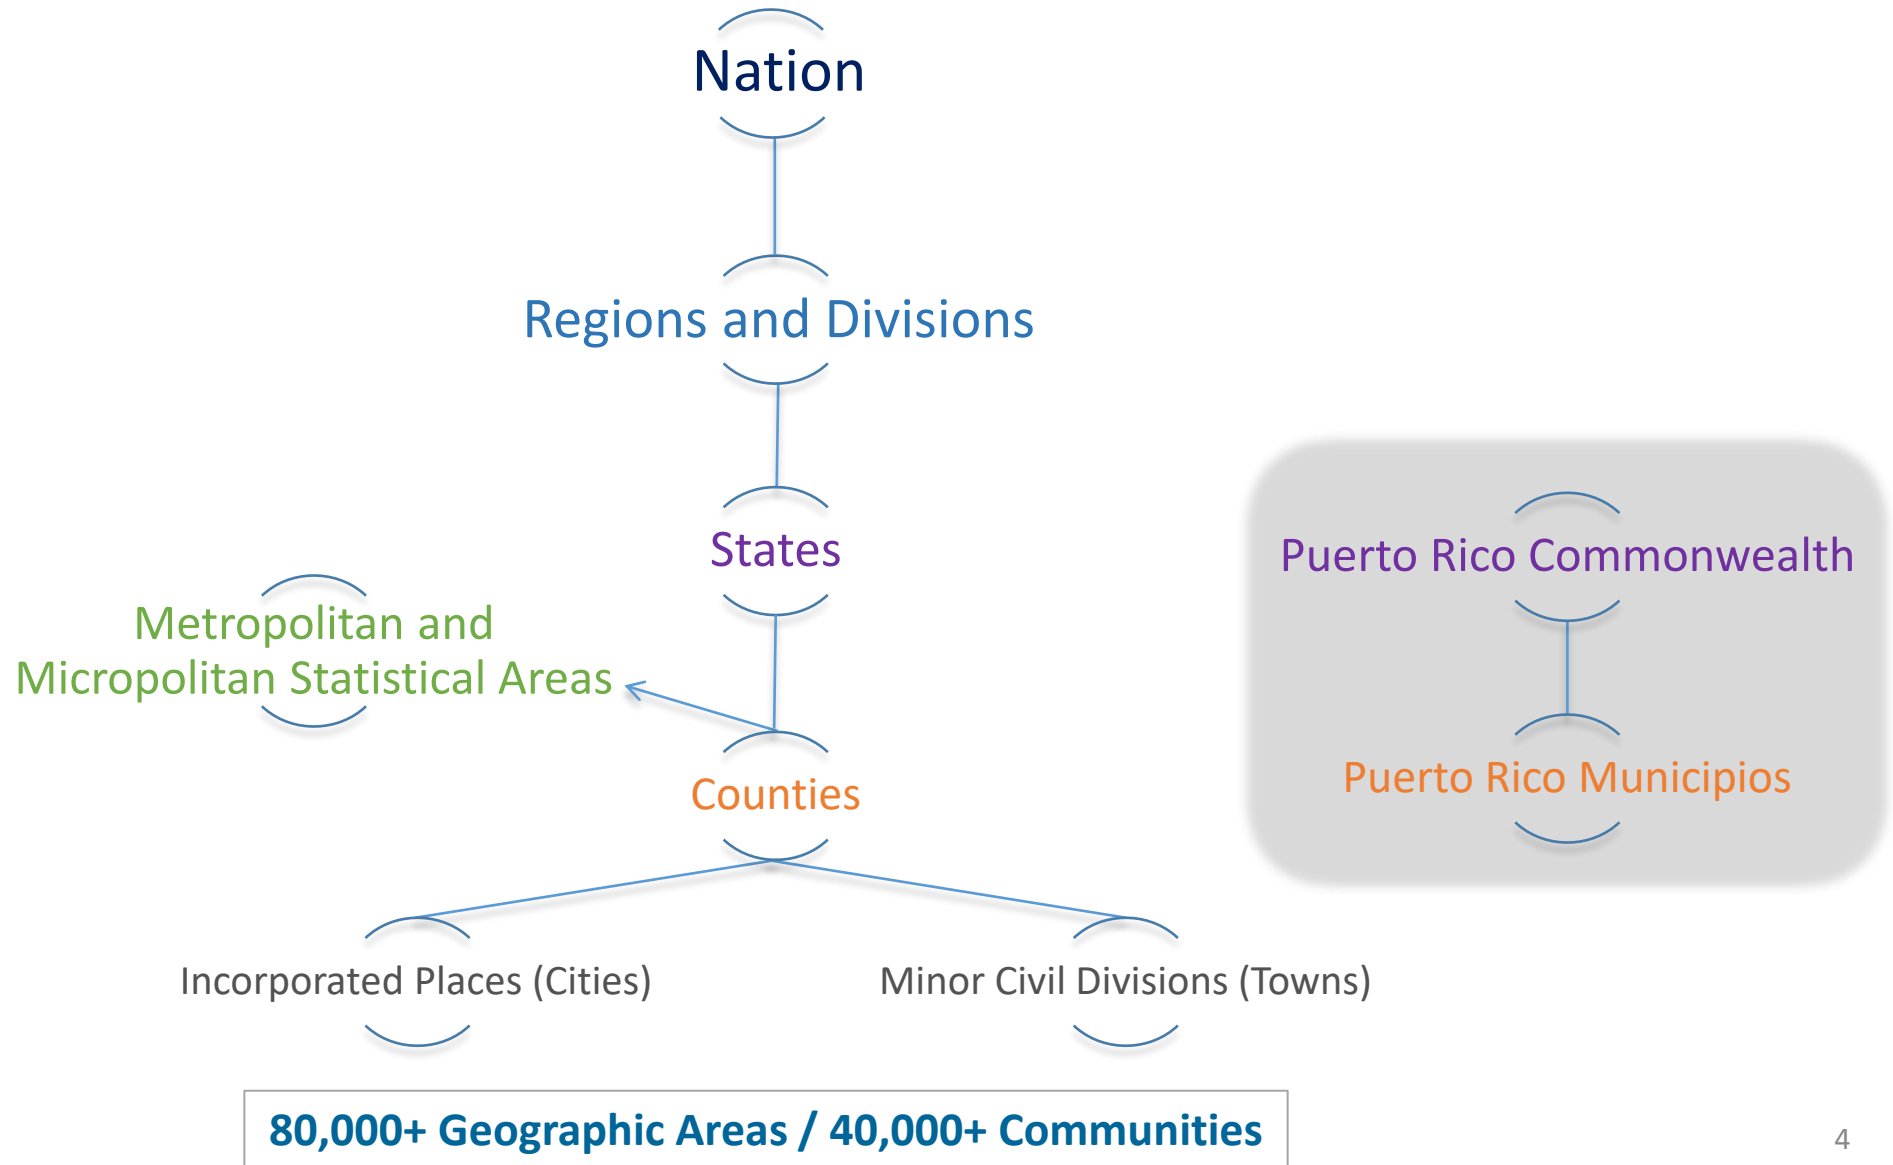

**Federal Mandate
(U.S.C. Title 13)**

**Allocation of
federal funds**

**Program planning for
public and private
services**

**Controls for
federal surveys**

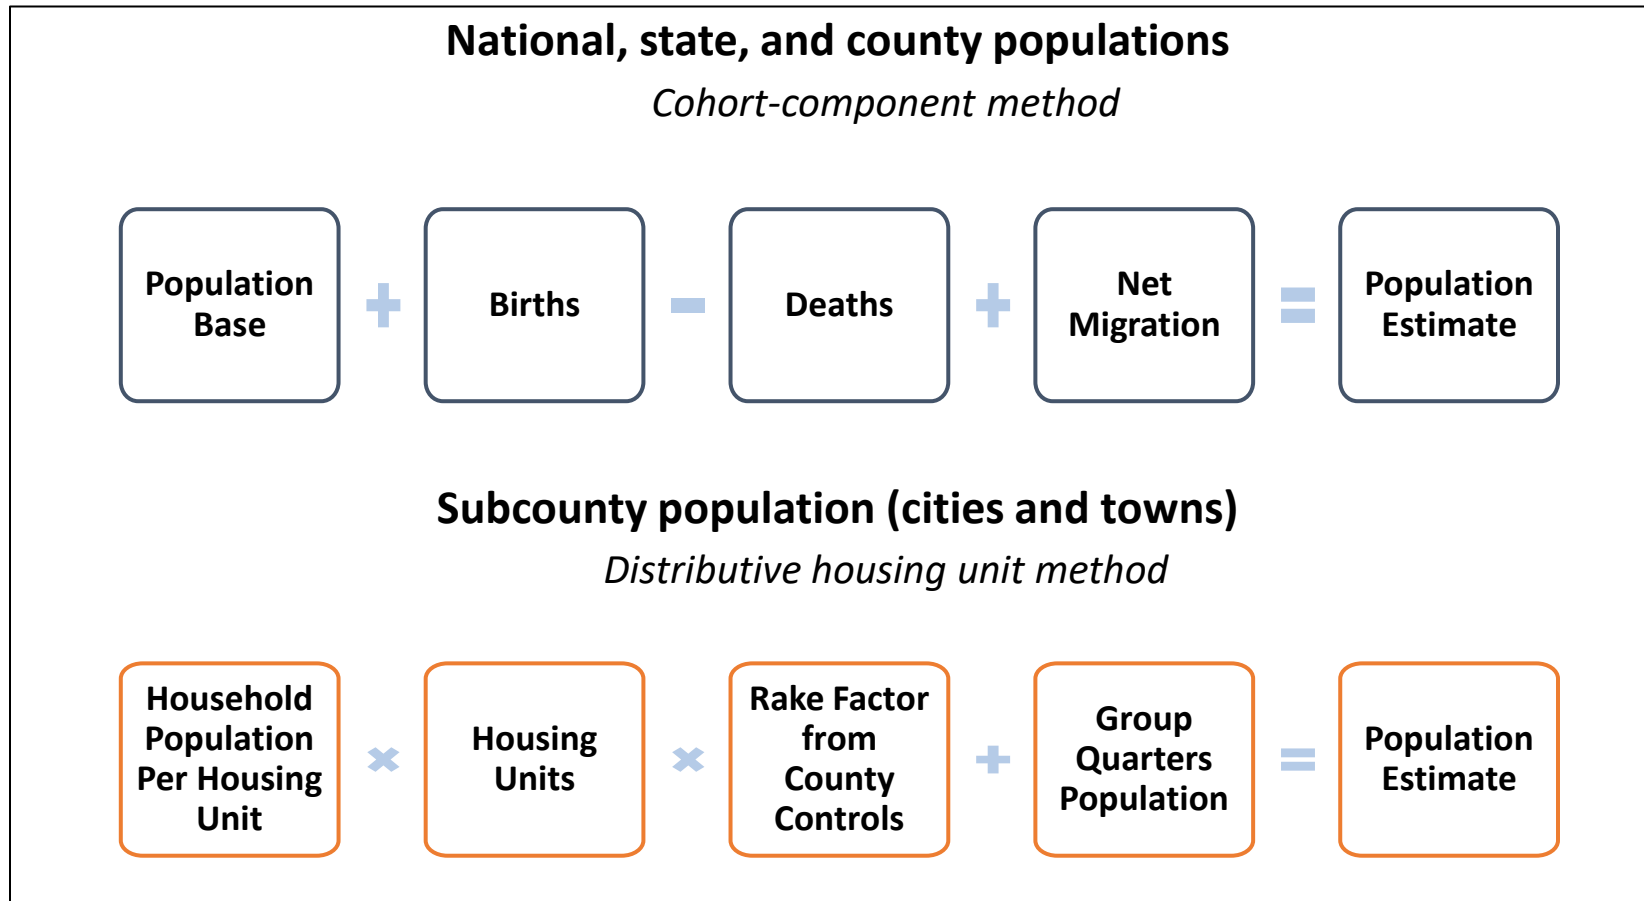

PEP Estimates Geographies

Population and Housing Unit Estimates by Type and Geography

| Estimate Type | U.S. | States | Metro/ Micro Statistical Areas | Counties | Cities and Towns | Puerto Rico | Puerto Rico Municipios |
|---|-----------------|---------------|---|---------------|---------------------|------------------|---------------------------|
| Total Resident Population | X | X | X | X | X | X | X |
| Components of Change (Births, Deaths, Net Migration) | X | X | X | X | | X | |
| Population Characteristics (Age, Sex, Race, Hispanic Origin) | X | X | X | X | | X (age & sex) | X (age & sex) |
| Monthly Population (Five Universes*) | X | | | | | | |
| Group Quarters Population | X (by char.) | X (totals) | | X (totals) | | | |
| Housing Units | X | X | | X | | | |
| *These five estimates universes are: resident, resident plus Armed Forces overseas, civilian, civilian noninstitutionalized, household. | | | | | | | |

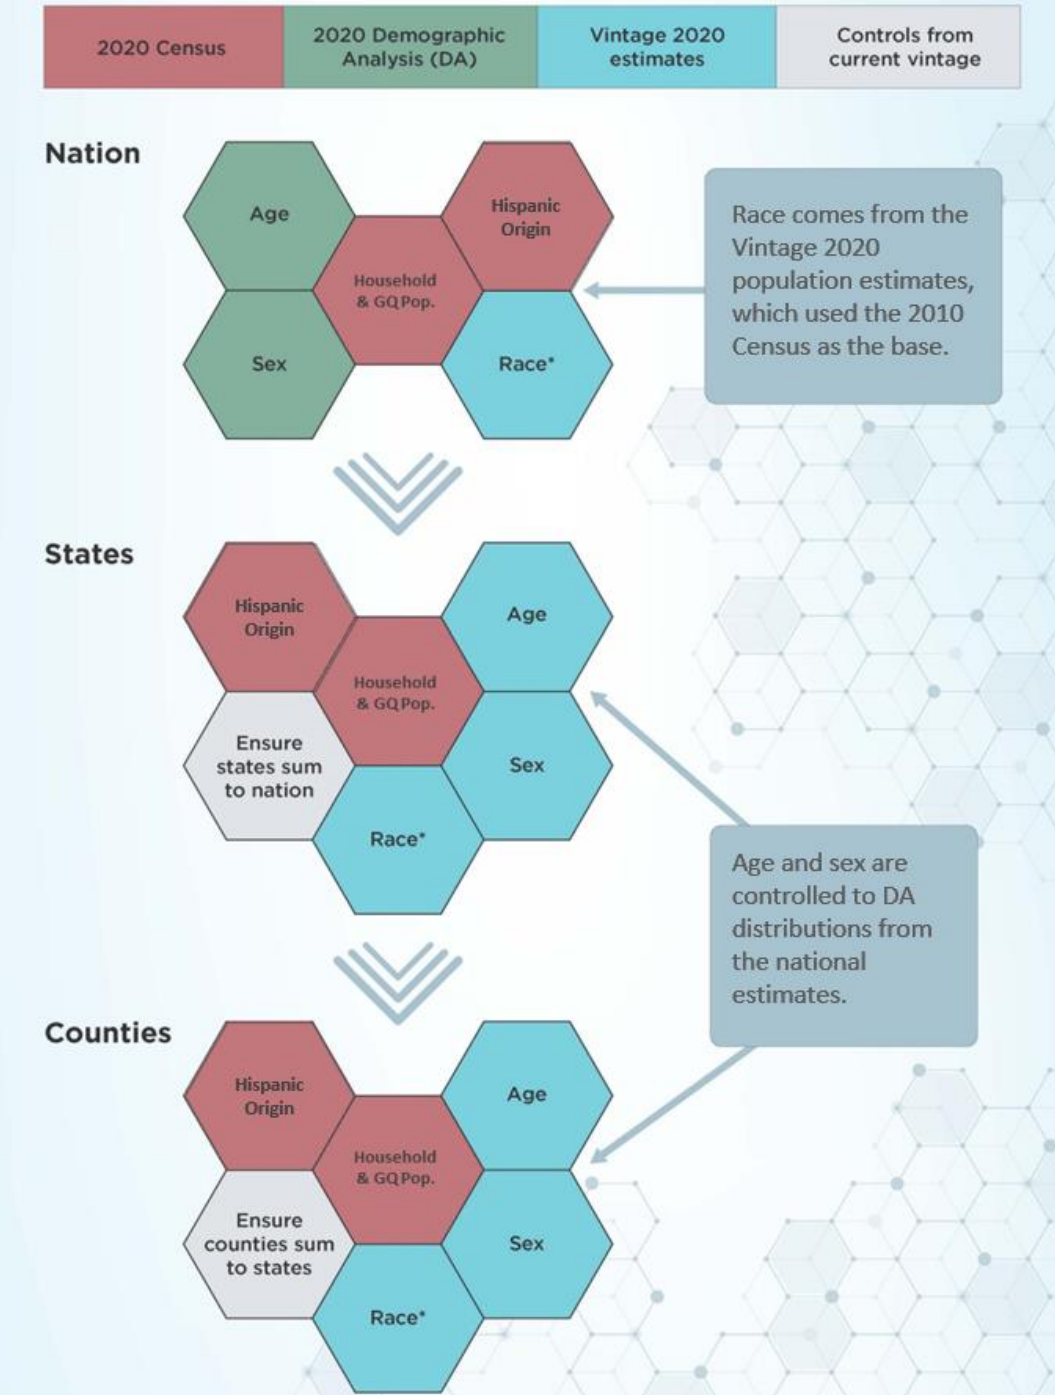

Population and Housing Unit Estimates Methodology

Population Estimates Input Data

| Component | Source of Data |
|-------------------------|--|
| Base population | Blended Base: 2020 Census, Vintage 2020, 2020 Demographic Analysis |
| Births | National Center for Health Statistics |
| Deaths | National Center for Health Statistics |
| Domestic migration | IRS Tax Records and Medicare Enrollment Records |
| International migration | American Community Survey, Puerto Rico Community Survey, Foreign Censuses and Population Registers |

Blended Base Approach

Availability of Vintage 2024 Population and Housing Unit Data Products

| Release Date* | Product | Geography |
|---------------|--|---|
| December 2024 | Population totals, components of change, and voting-age population | Nation, states, and Puerto Rico Commonwealth |
| March 2025 | Population totals and components of change | Metropolitan and micropolitan statistical areas, counties, and Puerto Rico municipios |
| April 2025 | Population by age and sex | Nation |
| May 2025 | Population totals-- | Cities and towns (incorporated places, minor civil divisions) |
| | Housing unit totals-- | Nation, states, and counties |
| June 2025 | Population by age, sex, race, and Hispanic origin-- | Nation, states, metropolitan and micropolitan statistical areas, and counties |
| | Population by age and sex-- | Puerto Rico Commonwealth and municipios |

**Dates subject to change.*

Ways to Access Estimates

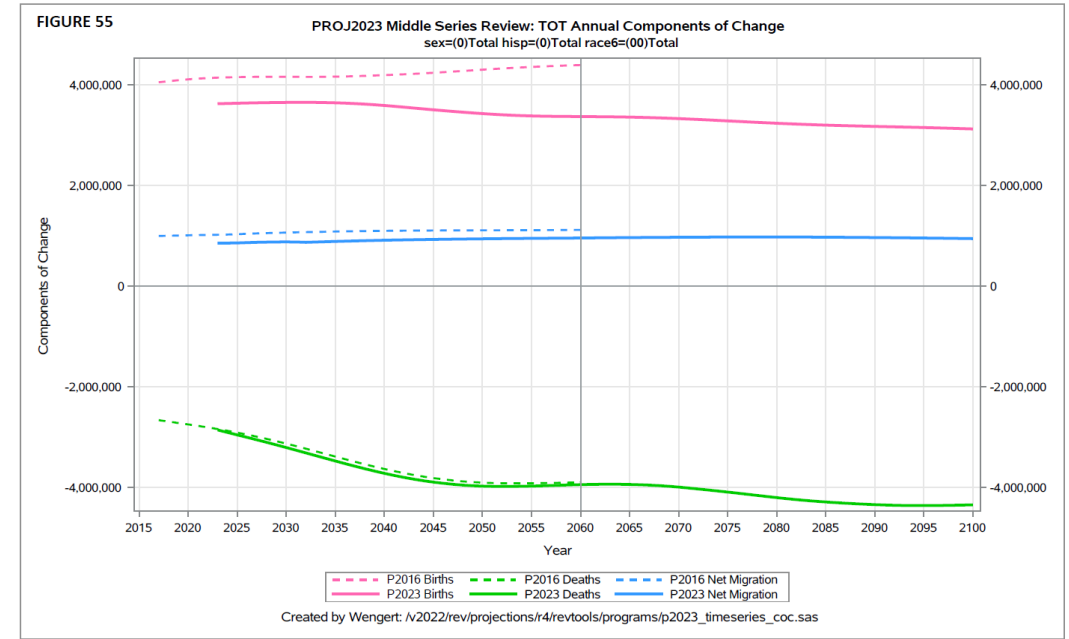

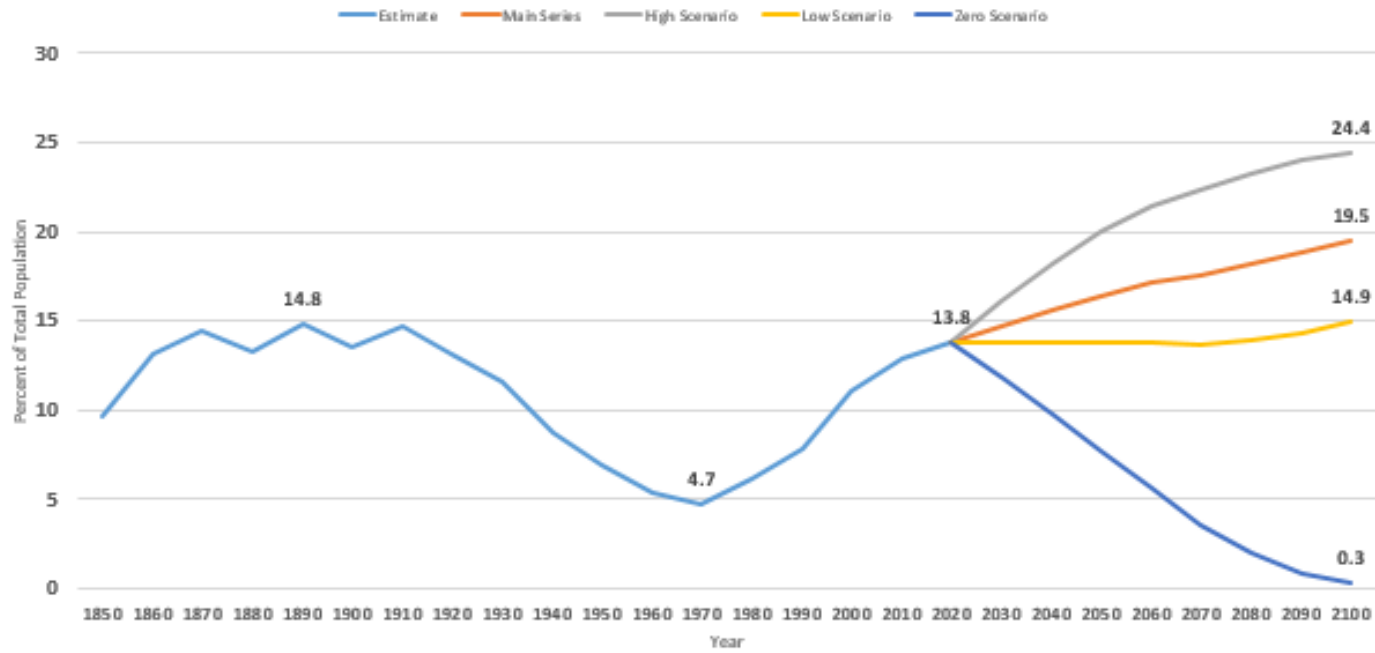

- PEP Webpage:
census.gov/programs-surveys/popest.html
- data.census.gov
- QuickFacts
- Application Programming Interface (API)

The screenshot shows the top navigation bar of the Census Bureau website with links for Partners, Researchers, Educators, Survey Respondents, News, NAICS Codes, Jobs, About Us, Contact Us, and Help. The main navigation includes Topics, Data & Maps, Surveys & Programs (highlighted), and Resource Library. A search bar is located on the right. The page title is 'Population and Housing Unit Estimates'. A left sidebar lists navigation options: Within Our Surveys & Programs, About, Data, Geographies, Guidance for Data Users, Guidance for Geographies Users, Library, News, Technical, and Documentation. The main content area features a 'Population Clock' showing 333,170,192 USA Population and 7,924,806,955 World Population as of September 19, 2022. Below this is a 'Featured' section for 'Population and Housing Unit Estimates Tables' and a 'Demographic Analysis' section.

This screenshot shows the 'Explore Census Data' interface. It includes the United States Census Bureau logo and a search bar with the text 'Find Tables, Maps, and more ...'. Below the search bar, there is a prompt: 'Try searching for [commute](#) in [all counties in](#) ...'. Navigation links for Help, Feedback, and Advanced Search are visible.

The screenshot displays the 'QUICKFACTS UNITED STATES' page. It features a search bar with the text 'Enter state, county, city, town, or zip code' and a 'SELECT A FACT' dropdown menu. The main content area is titled 'Table' and shows a table with columns for 'ALL TOPICS' and 'UNITED STATES'. The table lists various population statistics, including 'Population estimates, July 1, 2017, (2017)', 'Population estimates base, April 1, 2010, (2017)', and 'Population, Census, April 1, 2010'.

This screenshot shows the 'Population Estimates APIs' page. It includes a 'DEVELOPERS' sidebar with links for About this Section, API Forum, App Gallery, Available APIs, Geography, Guidance for Developers, News, Terms of Service, and Updates. The main content area features a 'Vintage 2019' section with a 'Request a KEY' button and a list of API call examples: 'API Call: api.census.gov/data/2019/pep/population', 'Examples and Supported Geographies: api.census.gov/data/2019/pep/population.html', 'Variables: api.census.gov/data/2019/pep/population/variables.html', and 'Example Call: ...'. A 'Related Information' sidebar on the right lists 'Population Estimates Categorical Variables' and 'You May Be Interested In'.

Projections

Estimated and Projected Median Age of the US Population: 2022 to 2060

What We Mean by Population “Projections”

- Population for future dates
- Based on assumptions about future demographic trends
- Use population estimates as a base
- Are made at the national level

Why We Disseminate Projections

**Program planning for
public and private services**

**Academic and business
research**

Population Projections Methodology

Cohort-component method

Accuracy of the Projections

The accuracy of projections is affected primarily by two things:

- The accuracy of the base population (recent estimates)
- The assumptions we make about future fertility, mortality, and international migration

Availability of Population Projections

- In recent times, only national-level projections
- Annual data based on the most recent estimates and extending several decades
- Content includes:
 - Total Population
 - Components (Births, Deaths, and Net International Migration)
 - Characteristics by
 - Single-year-of-age
 - Sex
 - Race
 - Hispanic Origin
 - Nativity

Availability of Population Projections (continued)

- Current Projections Released November 2023
 - First Census projections to include 2020 Census data
- Includes a main series and three alternative immigration scenarios
 - Low, High and Zero
- Covers 2023-2100
 - Age, sex, race, Hispanic origin and nativity through 2060
 - Limited to age, sex and nativity for 2061-2100
- Produced using primarily the same methodology as the 2017 projections with updated input data

How to Access Projections

Within Our Surveys & Programs

- [About](#)
- [Data](#)
- [Guidance for Data Users](#)
- [Library](#)
- [News](#)
- [Technical Documentation](#)

// [Census.gov](#) / [Our Surveys & Programs](#) / [Population Projections](#)

Population Projections

Population projections are estimates of the population for future dates. They are typically based on an estimated population consistent with the most recent decennial census and are produced using the cohort-component method.

2023 National Population Projections Tables: Main Series

These tables feature 2023 National Population Projections by age, sex, race, Hispanic origin, and nativity.

Table

2023 National Population Projections Tables: Alternative Scenarios

These tables feature 2023 National Population Projections by age, sex, race, and Hispanic origin for four migration scenarios.

census.gov/programs-surveys/popproj.html

Undercount of Young Children

What is the Issue?

- In the 2020 Census, young children (0-4 years old) had a larger undercount than any other age group: **Net undercount 5.4%**
- This is a persistent issue in the census despite major efforts to improve the count leading up to 2020
- We also see this issue in demographic surveys:
 - American Community Survey (ACS)
 - Current Population Survey (CPS)
 - Survey of Income and Program Participation (SIPP)
- The Census Bureau is committed to improving data on young children

Vintage 2021 Blended Base, Base Inputs, and 2020 Census Data by Age and Sex: April 1, 2020

Note: These 2020 Census data by age and sex represent a special tabulation of the 2020 Census with confidentiality protections applied using the 2020 Census Disclosure Avoidance System. The U.S. Census Bureau reviewed this data product for unauthorized disclosure of confidential information and has approved the disclosure avoidance practices applied to this release. (DRB clearance number CB-FY22-DSEP-001.)

Vintage 2021 Blended Base, Base Inputs, and 2020 Census Data by Age and Sex: April 1, 2020

Estimating International Migration

Estimating foreign-born immigration

- We use data from the ACS to estimate migration flows
 - Total population is developed by identifying the foreign-born population whose Residence One Year Ago (ROYA) was abroad
 - We use data from the ACS to assign the geographic distribution and demographic characteristics
- The ACS data we use is lagged by one year
- During COVID, we supplemented the ACS-based estimates with administrative data

Figure 2.
**Foreign-Born Immigration Estimates and Select Administrative Data:
 2010-2022**
 (In millions)

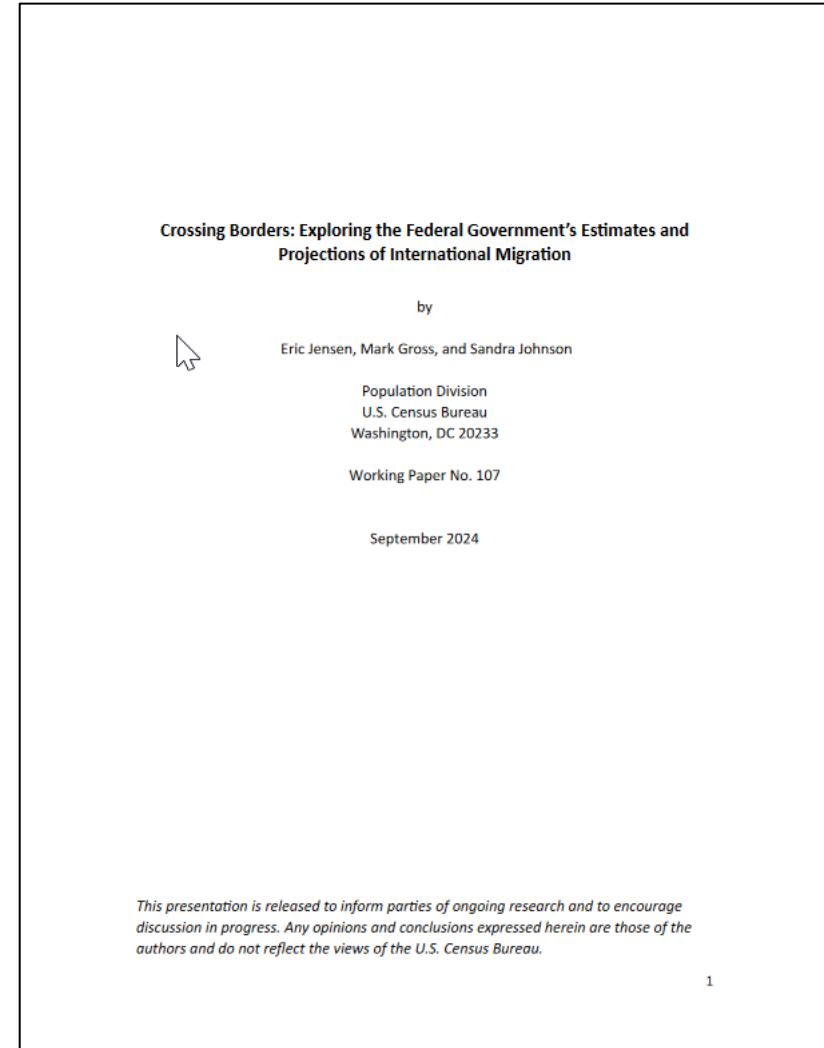

* Foreign-born immigration estimates adjusted for COVID-19 pandemic.

NIM updates for Vintage 2024

- Increased immigration at the southern border has been a challenge for federal agencies to measure
 - Census Bureau population estimates
 - Congressional Budget Office population projections
 - Office of Homeland Security Statistics
- Recent working paper highlights these challenges:

<https://www2.census.gov/library/working-papers/2024/demo/pop-wp107.pdf>

NIM updates for Vintage 2024 (cont.)

- A major research priority is identifying ways to make our ACS-based approach more current
- Consulted with academics to improve the methodology for estimating migration flows
- Explored administrative data from:
 - DHS US Border Protection Releases
 - DHS Office of Field Operations Paroles
 - State Dept Refugee Processing Center

Population Estimates and the American Community Survey (ACS)

How are the ACS and PEP Similar?

- Both disseminate total population and housing unit estimates
- Both disseminate population characteristics estimates by age, sex, race, and Hispanic origin
- PEP estimates are used as controls for ACS population and housing unit data, so 1-year estimates for larger areas are consistent

| B01003 Total Population | | | Notes |
|--|---------------|-----------------|----------------------------|
| American Community Survey | | | Universe: Total population |
| 2022: ACS 1-Year Estimates Detailed Tables | | | |
| Label | United States | | |
| | Estimate | Margin of Error | |
| Total | 333,287,562 | ***** | |

How are the ACS and PEP Different?

| | ACS | PEP |
|-------------------------|--|---|
| <i>Purpose</i> | <ul style="list-style-type: none"> • Sample estimates | <ul style="list-style-type: none"> • Provide annual estimates of the current population and total housing units by calculating change since the last census |
| <i>Collects</i> | <ul style="list-style-type: none"> • Detailed social, economic, housing, and demographic characteristics | <ul style="list-style-type: none"> • Not a survey • Uses administrative records and other data sources to calculate annual change in population and housing |
| <i>Content</i> | <ul style="list-style-type: none"> • Population and housing characteristics | <ul style="list-style-type: none"> • No social and economic detail • Population characteristics by age, Hispanic origin, race, and sex only • Housing unit totals only |
| <i>New Data Every</i> | <ul style="list-style-type: none"> • Year | <ul style="list-style-type: none"> • Year |
| <i>Time Represented</i> | <ul style="list-style-type: none"> • 1-year estimates: January 1-December 31 of data collection year • 5-year estimates: January 1 lower limit year to December 31 of upper limit year | <ul style="list-style-type: none"> • Estimate dates – First of selected months • Estimate intervals – Monthly, Annual, and Decade |

How are the ACS and PEP Different (cont.)

| | ACS | PEP |
|-------------------|--|--|
| <i>Geography</i> | <ul style="list-style-type: none"> • 1-year ACS estimates contain geographies with populations of 65,000 or more • 5-year ACS estimates can be found down to the block group level for select tables | <ul style="list-style-type: none"> • Nation, states, counties, cities, and towns • Puerto Rico Commonwealth and its municipios • Metropolitan and micropolitan statistical areas |
| <i>Statistics</i> | <ul style="list-style-type: none"> • Margins of error calculated at the 90% confidence level | <ul style="list-style-type: none"> • Not a product of sampling, so statistical confidence intervals are not needed. • Entire time series back to last census updated annually, so averages for time periods are not used |
