SECOND QUARTER FY 2024 - 2025

010.0170.09 PERFORMANCE-BASED PLANNING AND PROGRAMMING IMPROVEMENT

OBJECTIVE: PROJECT MANAGER: WARREN WHITEAKER

The SCAG project selection process for both the FTIP and the RTP/SCS have historically followed a "bottom-up" approach. The FTIP includes all regionally significant (i.e., using the transportation conformity definition) projects regardless of funding source, including projects solely funded by local and/or private sources. The CTCs along with local jurisdictions are responsible for the initial identification of projects that are consistent with the RTP/SCS & submitted to SCAG for recommended inclusion into the FTIP, with the exception of fund sources required to be selected by SCAG. SCAG adopted program guidelines for the competitive, performance-based selection of projects to be funded with CMAQ, CRP, & STBG.

The process for receiving federal and state dollars involves multiple steps before funds are awarded to a project and expended. The process generally begins at the CTC level where projects are nominated by local jurisdictions & CTCs. SCAG & the CTCs develop performance-based project selection criteria that prioritize projects which best enhance the transportation network and address the region's goals of improving mobility and promoting sustainability, including making progress on federal performance measures. All CTCs in the SCAG region also have developed long-range transportation plans to guide their investment strategies. SCAG assesses transportation performance at the system level when developing the RTP/SCS & FTIP consistency amendments. Local agencies and CTCs in turn use the RTP/SCS goals and strategies to guide their project development and county-specific long-range transportation plans.

The effort under this work program is intended to explore how SCAG can improve on a regional, performance-based, uniform approach to prioritize and select project and improve the process for determining effectiveness in performance target realization. Since this work effort spans multiple departments within Planning Division, it requires significant staff effort.

The Air Quality Planning and Conformity program oversees and performs regional transportation conformity determinations and related air quality planning, analysis, documentation, and policy implementation to help improve air quality in the SCAG region. Seven health-based National Ambient Air Quality Standards (NAAQS) for three different criteria air pollutants (ground-level ozone, particulate matter including PM2.5 and PM10, and carbon monoxide or CO) are applicable to the SCAG region. Twentysix areas have been designated by the US. Environmental Protection Agency (EPA) as nonattainment or maintenance areas under these NAAQS within the SCAG region. This program ensures RTP/SCS, FTIP, and their amendments comply with the federal Clean Air Act, federal transportation conformity regulations, and other applicable federal and state air quality planning requirements. Identifies and proactively addresses significant regional air quality planning and transportation conformity issues. Facilitates and fulfills federally required inter-agency consultation via Transportation Conformity Working Group (TCWG) including processing and acting as clearinghouse for particulate matter (PM) hot spot analyses for transportation projects within SCAG region. Updates and ensures timely implementation of transportation control measures (TCMs). Collaborates with the California Air Resources Board (ARB) and local air districts on development of air quality management plans/state implementation plans (AQMPs/SIPs). Fulfills federal and state air quality planning requirements for the SCAG portion of South Coast Air Quality Management Plans/State Implementation Plans (AQMPs/SIPs) (commonly known as Appendix IV-C). Tracks and reports on relevant air quality rule makings, policies, and issues. Represents SCAG in the development and implementation of Mobile Source Air Pollution Reduction Review Committee (MSRC) work programs. Provides staff support to SCAG Representative and Alternate on MSRC.

This was further analyzed by overlaying social vulnerabilities related to race/ethnicity and low income household status. This work culminated with a poster for the Transportation Research Board's Annual Meeting, where staff will present the analysis in Quarter 3.

070.0130.10 MODEL ENHANCEMENT AND MAINTENANCE

OBJECTIVE: PROJECT MANAGER: HAO CHENG

To ensure that SCAG's models remain up-to-date, we continuously update model inputs and parameters. We strive to enhance model procedures by incorporating new modeling methodologies, thereby improving SCAG's modeling capabilities. Additionally, we aim to boost the efficiency and quality of model operation by creating and enhancing operational tools and implementing QA measurements. To further enhance the accuracy and expand the capability of model data analysis, we regularly update the data processing tools. Our commitment extends to supporting various transportation planning activities, model calibration, and validation. This involves collecting and processing travel patterns and creating a traffic database for the 2028 RTP/SCS.

145.4956.01 SOUTHERN CALIFORNIA AIRPORT PASSENGER SURFACE TRANSPORTATION STUDY

OBJECTIVE: PROJECT MANAGER: HIROSHI ISHIKAWA

By conducting the study and survey, the airports and transportation agencies/commissions will be better able to address congestion in and around the airports by having a more thorough understanding of the surface transportation behavior and preferences of the airport passengers and employees coming to and leaving from the airports. Many of the airports, including Los Angeles International, Ontario International, and Hollywood Burbank, are currently in the process of developing landside access modernization, replacement terminal, people mover, and other facilities and infrastructure projects that will include airport ground access elements, which would benefit from additional airport passenger data and information.

145.4957.01 PLANNING FOR MAIN STREETS

OBJECTIVE: PROJECT MANAGER: RACHEL OM

Caltrans recently updated Main Street, California: A Guide for People-Centered State Highway Main Streets, which is shaped by five guiding principles that reflect the state's strategic goals and forms the basis of the Planning for Main Streets project: foster people-centered transportation infrastructure; improve safety and public health; elevate equity and livability; advance sustainability and climate action; and engage communities, partners, and stakeholders. SCAG, in partnership with Caltrans Headquarters and Districts 7, 8, 11, and 12, identified several state highways in the SCAG region that function as main streets, which are defined as state highways that are community streets, given their existing and planned land uses, related projects, and community priorities. SCAG is partnering with Caltrans Districts 7, 8, 11, and 12 and local jurisdictions to implement Caltrans' Main Street principles and planning processes for several state highway main streets corridors in the SCAG region. The Planning for Main Streets project assesses existing conditions, engages with communities to define each corridor's vision and corridor priorities, and develops conceptual plans and associated cost estimates for sustainable transportation improvements to position Caltrans and local jurisdictions for future grant funding opportunities and/or incorporation into future workplans with the goal of implementing improvements.

156.4939.01 THE SOBOBA TRIBAL CLIMATE CHANGE ADAPTATION PLAN

OBJECTIVE: PROJECT MANAGER: KIMBERLY CLARK

The Soboba Climate Change Adaptation Plan is a multi-phased project that includes an evaluation of existing conditions and vulnerability assessment to identify climate change threats to Tribal resources, including transportation infrastructure. This will be achieved by inventorying the Soboba road networks for erosion and drainage condition and using climate models that project primary and secondary effects for various emissions scenarios. This will allow for hotspots to be uncovered and targeted with improvement projects identified in the adaptation plan. This approach will be followed comprehensively for Tribal resources identified in this project.

PROGRESS

PERCENTAGE COMPLETED: 20 STATUS: IN PROGRESS

Accomplishments:

In Quarter 4 of FY 24, the Soboba Nation reviewed and signed off on the MOU. SCAG coordinating for project kickoff. Soboba will subsequently procure the consultant and SCAG will review deliverables and progress reports to Caltrans. In Quarter 1 of FY 25, SCAG reviewed the project's SOW, timeline, consultant selection criteria, and other materials for the RFP. SCAG signed off on the release of the RFP for procurement directly through the Soboba Nation. Given the late start for the project, which was necessitated by SCAG stepping in as a partner on the application (done at the request at Caltrans and Soboba), staff requested an extension on the project end date. In Quarter 2, Soboba completed the RFP and received one proposal. SCAG staff worked with Caltrans to obtain a public interest finding to move forward with the one proposal. It was approved by Caltrans and SCAG is working with Soboba to prepare materials for an upcoming Notice to Proceed.

OBJECTIVE: MARCO ANDERSON PROJECT MANAGER:

This task will support the implementation of the Sustainability Communities Program (SCP) Calls for projects and other local assistance projects that SCAG engages in. The Program serves as the primary funding vehicle where SCAG partners with local agencies to implement the goals, objectives and strategies outlined in Connect SoCal, and achieve an integrated regional development pattern that reduces greenhouse gas (GHG) emissions and Vehicle Miles Traveled (VMT), facilitates housing production, and promotes healthy, connected communities. The program delivery entails creation of tools and resources to ensure timely completion of the projects, as well as adherence to funding guidelines. This also includes the time spent by staff in providing technical assistance to the projects under the SCP program.

290.4862.05 REGIONAL ADVANCE MITIGATION AND CONSERVATION PLANNING (FY25 SB 1 FORMULA)

OBJECTIVE: PROJECT MANAGER: INDIA BROOKOVER

Provide technical assistance to support Regional Advanced Mitigation (RAMP) in the region & host convenings to help connect nascent RAMP efforts. The Regional Advance Mitigation Program (RAMP) is a strategy included in SCAG's 2024 RTP/SCS ("Connect SoCal") that would provide opportunities to identify potential environmental impacts from transportation projects early in the planning process and work with regulatory agencies to improve certainty, expedite project delivery and reduce permitting costs. The SCAG RAMP program would specifically help agencies identify and prioritize lands for conservation based on scientific data. Conservation of natural lands, as facilitated through RAMP prevents GHGs that would be generated by induced VMT should these lands be developed. This aligns with SB1 Sustainable Communities Grant objectives a) encourage local and regional multimodal and land use planning that furthers the region's RTP/SCS and b) contributes to the State's GHG reduction targets.

The fellow is also continuing work on implementation of Connect SoCal's strategy on water resilience in support of the Water White Paper: "Collaborate with partners to foster adoption of systems and technologies that can reduce water demand and/or increase water supply, such as alternative groundwater recharge technologies, stormwater capture systems, urban cooling infrastructure and greywater usage systems."

SECOND QUARTER FY 2024 - 2025

290.4914.02 LAND USE ALTERNATIVES DEVELOPMENT (FY25 SB 1 FORMULA)

OBJECTIVE: PROJECT MANAGER: KIMBERLY CLARK

Develop and promote local adoption and regional coordination on sustainable land use and transportation strategies for use in Connect SoCal 2024 that can promote water conservation, avoid flood hazards, and increase water supply to facilitate future sustainable development through groundwater recharge and improved storm-water management. This project helps to fulfill Connect SoCal PEIR Mitigation Measures and fulfill SCAG's anticipated Water Action Resolution. Overall, clean, safe, affordable, and reliable water supply is central to Southern California's people, economy, and natural systems and necessary to support the region's Forecasted Development Pattern at the center of Connect SoCal, and the associated sustainable transportation and land use strategies that help to reduce greenhouse gas emissions in accordance with requirements under SB 375. Further, SB 375 calls for reduced water usage and avoidance of flood hazards as a key requirement for transportation priority projects, and also that flood hazards (among other resource areas) shall be a factor in the development of SCAG's Sustainable Communities Strategy. Resilience of the region's water systems and supply is key to supporting the continuation of Southern California's quality of life, as well as the heartiness of current and future transportation investments that are often impacted by floods and extreme weather events, such as hurricanes or heavy downpours. This work will include interviews of transportation agencies and flood control districts, amongst others, to develop recommendations on SCAG's potential role to help address water issues in the context of sustainable and connected communities.

SECOND QUARTER FY 2024 - 2025

290.4915.02 CONNECT SOCAL - DEVELOPMENT OF LAND USE STRATEGIES (FY24 SB 1 FORMULA)

OBJECTIVE: PROJECT MANAGER: ELIZABETH CARVAJAL

The Land Use Strategies task will allow staff to implement regional planning policies and implementation strategies for activities that support local adoption of best practices around 15-minute communities to support communities across the region to utilize this concept and to inform the framing for a future call for projects. The land use strategies included in Connect SoCal, including 15-minute communities, will promote efficient land use, such as improving multimodal services or access, as well as VMT or GHG reductions. A 15-minute community is one in which you can access all of your most basic, day-to-day needs within a 15-minute walk or bike ride of your home. For SCAG's purposes, the 15-minute community includes access to day to day needs through a range of mobility options that create opportunities to reduce single occupant vehicle trips. It is an aspirational framework for making our cities more inclusive, more equitable, and thereby more effective. The 15-minute community concept has been included in Connect because the concept can apply broadly to many types of communities across the SCAG region and touches on a number of land use and policy goals integral to realizing the growth vision in Connect SoCal.

SECOND QUARTER FY 2024 - 2025

290.4931.01 SCAG REGIONAL TRAVEL SURVEY (FY24 SB 1 FORMULA)

OBJECTIVE: PROJECT MANAGER: YANG WANG

The proposed Regional Travel Survey is a new multi-year project starting from FY23 to FY25. In FY23, staff developed the SOW and secured funding eligible for project cost internally and externally. The goal in FY24 is to have the consultant onboard to review survey instrument, conduct pilot testing followed by a full survey collection.

PROGRESS

PERCENTAGE COMPLETED: 100 STATUS: COMPLETED

Accomplishments:

Completed the first wave of survey data collection in three batches of invitation mail drops and reminder postcard drops.

Closely analyzed survey responses in areas through live dashboard to monitor the progress of survey data collection.

Received and reviewing the project deliverables of first wave data collection.

Prepared the interim dataset to SCAG modeling team and the ABM consultant for further processing to support the development of SCAG ABM model enhancement project.

Reviewed the survey sampling plan for the Wave 2 data collection.

Worked with SCAG MPA team to review outreach strategies to increase the public awareness of this project that may yield

SECOND QUARTER FY 2024 - 2025

higher survey response rates.

Issues:

The first wave of survey data collection suffered from a lower than expected survey response rate, which is believed to be impacted by the presidential election season.

Part of the survey areas are impacted by recent wildfires. The destruction of residential buildings makes mailed survey invitation delivery impossible. The displacement of impacted households also yield atypical travel behaviors.

Resolution:

The project team is reviewing outreach strategies that can potentially increase survey response rate. Also, the survey collection time frame is scheduled in Spring 2025, which does not conflict with major events and holidays.

The survey team will exclude census block groups where majority of buildings are damaged by the recent wildfires from being sampled for survey participation. The impact of the recent wildfires to this project is believed to be very minimal since the fires are no longer active at the time of this quarterly report and the upcoming wave of survey data collection will last until the end of May 2025.

Comment:

Due to the lower than expected response rates observed from the first wave of survey data collection, the project team is adjusting the response rate assumption in the upcoming wave of data collection based on the real-world observation. In order to achieve the project goal of collection a certain number of households, more survey invitations will be ordered for printing and mailing. This will drive up the project cost.

290.4948.01 SCENARIO PLANNING AND MODELING (FY25 SB 1 FORMULA)

OBJECTIVE: PROJECT MANAGER: JUNG A UHM

Enhance SPM modeling components to improve their analytic rigor and relevance of model outputs in regional and local level analysis. Also maintain the current system to ensure optional performance. Update Scenario Planning Model (SPM)'s transportation analysis engine with the latest travel data from SCAG's regional model, accounting for various trip reduction policies and programs. Also, enhance its neighborhood level VMT analysis features to support local and regional level transportation and land use planning that promotes growth in Connect SoCal identified Priority Growth Areas to reduce Vehicle Miles Traveled (VMT) and transportation related Greenhouse Gas (GHG) emissions. Key deliverables include a web-based VMT analysis tool integrated with updated SPM transportation engine to assist in the analysis of the potential effects of land use and transportation decisions.
